THE

FOUNDRY TRADE JOURNAL

(with which is incorporated THE IRON AND STEEL TRADES JOURNAL).

ESTABLISHED 1902.

VOLUME XXIV.

July to December, 1921.

Head Offices:
Bessemer House, 5, Duke Street, Adelphi, London, W.C.2.

XUM

INDEX TO VOLUME XXIV.

A

Accounts, Experimental, 475.
Aeroplane Construction, Materials used in, 196.
Air-Driven Wire Brush for Metal Cleaning, 240.
"Alchol" Band Polishing Machine, 74.
Aluminium Castings, Cracks in, 380.
Aluminium Pistons for Petrol Engines, 187.
American Foundries, Impressions of, 113.
Annealing Furnace, Gas-Fired, 116.
Annealing of American Malleable Cast Iron, Metallurgy of, 402.
Annealing Practice, 452.
Antimony in Brass, Determination of, 384.
Armoured Concrete Road Construction, 147.
Arsenic in Brass, Determination of, 384.
Atmospheric Conditions and Industrial Efficiency, 375.
Automatic Heat-Treating Furnace, 148.
Automobile Engine Cylinders, Cast-Iron for, 151. 212, 274.
l'Avebene, 7.

B

Baking Linseed Oil Cores, 397.
Basic Hearth Electric Furnace and some Problems of Cast-Iron, 236.
Belt Pulley Castings, 439, 461, 502.
Belt Pulley and Moulding in Halves, 337.
Blanks for Change Wheels, Moulding, 264.
Blast Furnace, Increasing the Efficiency of an American, 256.
Body, 293.
Brass Casting, 277.
Brass Ingots, Casting of, 276.
Brass Plant, Modern, 133.
Brazilian International Exhibition, 1922, 193.
"Breakir" Sand-Mixing Machine, 135.
British Cast-Iron Research Association, 358, 417, 503.
British Cast-Iron Research Association, Work of the, 201.
British Industries' Fair, Birmingham, 469.
British v. Continental Brass, 426.
Broad Oaks Ironworks, Foundry at, 273.
Bronze Propellers, Erosion of, 110.
Bronze Runner, Moulding a, 9.
Burning-on, 158.

C

Calculating Charges for Foundry Irons, 378.
Case Hardening, Some Notes on, Part II., 29.
Casting Large Pipe Fittings, 87.
Cast-Iron and Steel for Buildings, 76.
Cast-Iron for Automobile Cylinders, 151, 212, 274.
Cast Iron for Foundry Purposes, 435.
Cast Iron, Standards for, 245.
Chaplets, Avoiding the Use of, 478.
Chaplets, New Method of Securing, 177.
Canadian Foundry, New, 52.
"Characteristic Curves" of the Heat Treatment of Steels, 203.
Charging Apparatus, Simple, for Siemens and other Metallurgical Furnaces, 472.
Chilled Cast-iron Wheels, 47.
Chilled Cast-iron Wheels, Some Failures of, 164.
Chromium in Steel, 459.
Chromium Steels and Irons, 418.
Cleaning Steel Castings, 307.
Cleveland Technical Institute, Middlesbrough, 270
Climax Malleable Works, 421.
Coke on Cupola Working, Influence of Poor, 395
Colloidal Theory of Rust, 463.
Columns, Tests of Built-up, 466.
Combined Iron and Steel, 422.
Combustion, Chemistry of, 99.
Constructing Patterns to Favour Moulding, 279, 301.
Co-operation, 270.
Copper Alloys, Heat-Treatment of, 476.
Copper in Brass, Determination of, 387.
Copper, Standardisation of, 148.
Copper Wire, Melting, 369.
Cores for Turbine Castings, Large, 179.
Correspondence:—
  Apprenticeship, Question of, 13.
  British Cast-Iron Research Association, 436.
  Castings without Feeding Heads, Pouring, 60, 286.
  Cast-Iron, Electrically Melted, 295.
  Foundry Coke, Sulphur in, 379, 398.
  Foundry Costs, 494.
  Foundrymen's Conference, 247.
  Foundry Problems, Some Perplexing, 436.
  Making Moulding Boxes, 398.
  Quality of Pig-Iron, 13.
  Receivers, Portable, 436.
  Sandmill Troubles, 387.
  Scientific Foundry Methods, 186
  Silicon in Cast Iron, 186, 246
  Stainless Steels, 153, 458.
  Testing of Cast Iron, 295.
Corrosion in Iron and Steel Pipes, Control of, 11.
Corrosion, Internal, of Cast-iron Water Mains, 414.
Corrosion, Principles of Alloying to Resist, 318
Costing of Cupola Mixes, Note on the, 170.
Cupola Tapping Device, 343.
Cupola Working, Influence of Poor Coke on, 395.
Cost of Cutting Cast Iron with Oxy-Acetylene, 365.

D

Damascene Steel, 285.
Defective Castings, Cause of, 383.
Design, Equipment, and Organisation of a Modern Foundry, 515.
Design of a Foundry for Engineers' Castings, 77.
Die Block Steel, Composition of, 460.
Ductility of Metals, New Method for Determining the, 85.

E

Economising on Special Jobs, 276.
Egler Blow Torch for Open-Hearth Furnaces, 91.
Elbows with Green Sand Cores, Moulding, 72.
Electrical Melting in Revolving Moulds, 111.
Electric Furnace Basic Hearth, and some Problems of Cast-iron, 236.
Electric Furnace Hearths, Stability of Conducting, 177.
Electric Furnaces for Non-Ferrous Metals, 19.
Electric Furnaces, Operating Details of, 388
Electric Furnace Progress in 1921, 359.
Electric Runabout Crane Truck, 356.
Electric Vitreous Enamel Furnace, 155.
Electron Metal, Some Notes on, 467.
Enamels, Preparation of, 154.
Enamels for Cast Iron, Notes on, 86.
Endurance Testing Machines, 446.
Export Credit Scheme, New, 494.

F

"Ferolux" and the Sulphur Problem, 178.
Ferro-Chromium and Stainless Iron, 413.
Ferro-Vanadium, 306.
Fire Tests of Building Columns, 75
First Steel Foundry in Ireland, 510
Flask of Novel Design, 343.
Flour-Mill Rolls, Chilled, 284.
Fly Wheels, Moulding Heavy, 131.
"Ford" Foundry, New, 316, 339.
Foundries—Good, Bad and Indifferent, 73.
Foundries of Messrs. Hamilton & Sons, Limited, Cardiff, 100.
Foundry and Pattern-shop Control, 90.
Foundry Apprentices, 249.
Foundry at Broad Oaks Ironworks, 273.
Foundry Congress at Liège, 245.
Foundry Costs and Establishment Charges, 437.
Foundry Costs and Establishment Charges, Discussion on, 470.
Foundry Exhibition, British, 406.
Foundry "Inquests," 463
Foundry Irons for Particular Uses, 365.
Foundry Management, Some Details of, 319, 361.
Foundry of Messrs. Hall & Stells, Limited, Newcastle, 362.
Foundry Pig-iron, 1.
Foundry Pits, 119.
Foundry Problems, Some Perplexing Addenda to, 249.
Foundry Queries:—
  Chilled Rolls, 396.
  Electric Furnace Hearths, 130.
  Fluxes for Brass Melting, 70.
  Sand-Mill Trouble, 300.
Foundry Re-organisation, 149, 192, 282, 305, 338, 385, 399.
Foundry Technical Library, 2.
Foundry Work in Holland, 448.
French Works' Educational Scheme, 23.
Furnace, Building a Natural Draught Melting, 171.
Furnace Costs, Co-relation of, 163.
Furnaces, High Frequency, 127.

G

"Galeco" Rust-Proofing Process, 129.
Gas in the Foundry, 464, 483, 504.
Gear Patterns, 194.
Genelite, 157.
Gibbons-Van Marle Charging Machine, 69.
Grey Iron Castings, American Standard Specifications for, 327.
Grey Iron Castings, Problem of, 497, 501, 511.
Growth of Length Gauges, 191.
Gurney Foundry Company, Limited, 166.

670.5 v. 24

H

Hall & Stell's Limited, New Foundry, 362.
Hamilton & Sons, Limited, Cardiff, Foundries of Messrs., 190.
Heat Treatment of Heavy Forgings, 7.
Heat Treatment, Some Notes on, 72.
High-Speed Steel, Hardening, 54.
Hot-Strip Coiling Machine, 272.
Hydraulic Rams, Moulding, 299.

I

Influence of Recalescence on the Length of Various Wires, 100.
Inherent Properties of Pig-Iron, 275.
Inherent Properties of Pig-Iron, Some Notes on the, 307.

Institution of British Foundrymen.

Annual Conference, 221, 225.
Basic Hearth, Electric Furnace, and Some Problems of Cast-Iron, 236, 249.
Some Perplexing Foundry Problems, 257.

Birmingham Branch.

Electric Furnaces in the Foundry, 442, 487.
Foundry Practice, Some Principles Underlying, 333, 367.

Coventry Branch.

Foundry Management, some Details of, 319, 367.
Gas in the Foundry, 464, 483, 504.
Pattern Plates, some Notes on, 415, 451.

Lancashire Branch.

Electron Metal, some Notes on, 467.
Hard Castings, Discussion on, 345
Presidential Address, 325.
Slow Filling of Moulds, 361.

London Branch.

General Meeting, 155.
Metal Moulds in the Foundry, 476.
Presidential Address, 407.
Some Perplexing Foundry Problems, 423.

Newcastle Branch.

Burning-on and Bell-Founding, 505
General Meeting, 488.

Sheffield Branch.

Presidential Address, 450.

Scottish Branch.

Semi-Steel, 74.

Institute of Metals, Birmingham Meeting, 47.
Institute of Metals, : Properties of some Nickel-Aluminium Copper Alloys, 278.
Internal Combustion Engines, Making Castings for—II., 37.
International Foundry Trades Exhibition, 187, 396.
Iron and Steel Institute, Autumn Meeting in Paris, 202.
Iron and Steel Works, Practice, 427.
Iron Foundry of Messrs. Mavor & Coulson, New, 344.
Iron Foundry Problems, 479.
Iron in Brass, Determination of, 387

J

Japanese Iron and Steel Industry, 60.
Jolt-Ramming Machine, New, 452.

L

Laboratory Furnace for Deformation Temperature of Refractories, 188.
Liége Foundry Exhibition, 294.
Light Alloys Research Committee, Eleventh Report of, 348.
Line Cracks in Steel, 313.
Loco. Frames of Cast Vanadium Steel, 283.

M

Malleable Castings for Automobile Use, 132.
Malleable Cast-iron, Compression, Cross Bending and Shear Properties of American, 175
Malleable Cast Iron, Sulphur in, 189.
Malleable Cast Iron, Triple Process of Manufacturing, 95.
Malleable Iron Castings, Properties and Limitations of, 357.
Mavor & Coulson's New Iron Foundry, 344.
Melting Losses of Aluminium and its Alloys, Estimated, 93.
Metal Moulds in the Foundry, 476.
Metals, Working of, 364.
Motor-Driven Mitre Box, 76.
Moulding Boxes, Making, 356, 381.
Moulding Machine, "The General" Hand-Operated, 126.
Moulding Sand, Reclaiming, 486.
Munich Foundry Exhibition, 429.

N

Nathusius Electric Furnace, 71.
Nickel in Brass, Determination of, 387.

O

Oil Core Sand Mixer, 369.
Oil Cores, Baking Linseed, 397
Oil Fuel Burners in the Foundry, "Aurora," 428.
Oil Sand Cores, 248.
Oil-Fired Annealing Furnace, 120.
Open Sand Moulding, Points in, 449.
Overstrain on the Elastic Properties of Steel, Effect of, 50.
Oxygen in Cast Iron, Importance of, 269.

P

Patents Applications for, 101.
Patent Specification Abridgments, 520.
Patterns, Fallacy of Weighing, 247.
Pattern-Making and Moulding Malleable Cast-Iron, 376.
Pattern Plates, Some Notes on, 415, 451.
Pattern Stores, Model, 27.
Pennsylvanian Foundry Extensions, 400.
Phosphorus in Brass, Determination of, 396.
Phosphorus in Iron and Steel, Colourimetric Estimation of, 61.
Pig-Breaking Machine, New, 519.
Pig-iron, Standardisation of, 493.
Pipe Fittings, Casting Large, 87.
Pipe, Moulding an Odd-shaped, 401.
Pouring Castings without Feeding Heads, 108.
Pouring Castings without Runners, 3.
Pouring Castings without Runners, Some Experiments on, 35.
Practical v Academic Inspection, 447.
Production Chart, Simple Foundry, 409.
Progress of the Iron Foundry during 1921, 509.
Protective Coatings for Metals, 136.
"Pyrotip" Heater, 214.

R

"Rapid" Electro-Magnetic Separator, 157.
Re-arranged Steel Foundry of the Chicago Foundry Co., 89.
Recalescence Points, Determination of, 510.
Refractory Industry, American, 222.
Refractory Materials of the London Basin, 314
Reorganising a Foundry, 14.
Research, Concrete Results from, 342.
Reversible Thermal Expansion of Silica, 296
Rock-Drill Steel, Heat Treatment of, 215
Rolls, Manufacture of, 167.
Rustless Iron, Potentialities of, 435.

S

Sand-Blast Table, "Doelcam," 477.
Sand-Cutting and Screening Machine, New, 94
Sand-Mixing Machine, "Breaker," 135.
Sand-Throwing Machines, 10
Sawing Machine, Double Dimension, 28.
Scrap Breaking, 43.
Scratches in Materials, Effects of, 98.
Shipping, Engineering and Machinery Exhibition, 205, 223.
Silumin Metal, 482.
Slag Ladles, Moulding, 271.
Slow Pouring of Castings, 331
Some Perplexing Foundry Problems, Addento, 265. 265
Some Perplexing Foundry Problems, Some Written Opinions on, 260.
"Sorby" Lecture, 331
Spain, Industrial Conditions in, 115.
Spots in Iron Castings, Hard White, 457.
Squares and Straightedges, 100.
Stainless Steel, 107.
Stainless Steel, Heat-Treatment of, 118.
Steel Castings, Some Factors in the Manufacture of, 55.
Steel Castings, Manufacture of, in Green Sand, 146
Steel Deoxidisers, 59.
Strickles, 150.
Suitability of Processes, 185.
Sulphur and Phosphorus in Steel Ingots and Castings, 174.
Surface Condenser, Moulding a, 207.
Synthetic Pig, Use of, 125.
Systematic Research Work, 353.

XUM

T

Tar-Oil-Fired Furnaces, 315.
Teams Iron Works, 24.
Teeming Speeds, 145.
Testing Castings, Economy of, 369.
Testing Machines, Endurance, 446.
Thacher Process of Moulding Propellers, 79.
Time of a Blow, Experiments on the, 314.
Transport Improvements in a Remodelled Foundry, 156.
Trimming Shop Atmosphere, Purifying the, 53.
Triplex Process, 85.
Tungsten and its Compounds, 109.

U

United Steel Corporation of Asia, Limited, 366.

V

Value of the Weighing Machine, 107.
Vickers, Limited, Naval Construction Works, Barrow-in-Furness, 253.

W

Weighing Apparatus in the Foundry, 222.
Welding (Electric) of a Cast-Iron Rope-Drive Flywheel, 382.
Welding Ladle Spouts, 259.
Welding Machines, Recent Progress in the Construction of Electric, 78.
Wire Brush, Air-Driven, for Metal Cleaning, 240.
Wood, Standardisation of, 67.
Worthington-Simpson, Newark-on-Trent, Works of, 48.

XUM
